Jas Sohi

COURSE

Data Wrangling with MongoDB

Code Functionality**Meets Specifications**

- All required exercises are solved correctly.

Code Readability**Meets Specifications**

- Code is well-structured and readable.

Problems Encountered in your Map**Meets Specifications**

- Your response shows an understanding of the process of auditing data.
- Good job for discussing issues specific to your area, such as street naming conventions.

Overview of the Data**Exceeds Specifications**

- You provide a very good overview of the dataset.
- You use a variety of MongoDB aggregation queries to answer questions about the dataset in detail.

Other ideas about the dataset**Meets Specifications**

- Good job for discussing dataset completeness and the fact that a large number of documents contain a very minimal number of fields.

PROJECT EVALUATION

Project Exceeds Specifications
